DATA AT CHILD LEVEL - CHILD QUESTIONNAIRE

This section describes the variables and their codes found in the file VN_R5_OCCH_OlderChild and several sub files which come directly from the Young Lives Child questionnaire. The following codes are standard across most of the numeric variables in the dataset:

- 77=Not known - this is where the respondent says they do not know;
- 88=Not applicable - this is where the question is not applicable because of a response given to an earlier question;
- 99=Missing - the question was missed during fieldwork or was not clearly recorded;
- 79=Refused to answer - the respondent did not want to answer the question.

For variables where these values are feasible for the question the missing value codes are negative.

DATA AT CHILD LEVEL - CHILD QUESTIONNAIRE

This section describes the variables and their codes found in the file

VN_R5_YCCH_YoungerChild and several sub files which come directly from the Young Lives Child questionnaire. The following codes are standard across most of the numeric variables in the dataset:

77=Not known - this is where the respondent says they do not know;

88=Not applicable - this is where the question is not applicable because of a response given to an earlier question;

99=Missing - the question was missed during fieldwork or was not clearly recorded;
