PEABODY PICTURE VOCABULARY TEST (PPVT)

FIELDWORKER: It is very important to assure adequate conditions for the assessment. You should look for a place with adequate lighting (natural or artificial), relative absence of noise and a flat surface for the child to work on. If these conditions are not available, try to look for other space or reschedule if possible.

FIELDWORKER: Use the PPVT picture easel here. Be sure to read the training items with the child and make sure the child understands what needs to be done before starting the test.

All instructions for introducing the PPVT and using the Training Items are located on the examiner's manual. Use Training Items C and D (designed for children 8 years and older).

FIELDWORKER: TRAINING ITEMS

CENTRE FOR ECONOMIC AND SOCIAL STUDIES

Begumpet, Hyderabad – 500 016, Phones : 040-23402789, 23416780, Website: www.cess.ac.in

FIELDWORKER: After you have administered the appropriate Training Items, begin testing using the Set of Test Items corresponding to the test taker's age. Once you begin a set, always administer all 12 items in that set in order, and always start with the first item in the set.

Use numerals (1-4) to record the test taker's response to each item in the blank in the "Resp" column. The "Key" column indicates the correct response (1-4). Compare the child's response with the correct response and indicate errors by drawing a line through the E in the last column as shown below:

Item	Word	Key	Resp	Error
1	Bus	(4)		E

At the end of each set, record the number of errors in the box provided.

FIELDWORKER: Please complete questions 1.2 and 1.3 **after** administering the PPVT with the child. (These items will aid the database entry process.)

1.2	Lowest item responded to (possible values: from 0 to 204, -79 Refused to answer, -88=NA)	[____]
1.3	Highest item responded to (possible values: from 0 to 204, -79 Refused to answer, -88=NA)	[____]

READING AND WRITING ITEMS

FIELDWORKER: It is very important to assure adequate conditions for the assessment. You should look for a place with adequate lighting (natural or artificial), relative absence of noise and a flat surface for the child to write. If these conditions are not available, try to look for other space or reschedule if possible.

FIELDWORKER: Use the literacy card here. Administer the items on reading and writing with the literacy card and fill out the items below. For writing item, hand the child the Cognitive Development and Achievement Questionnaire opened on the **Answer sheet** page. The child must write the sentence in this answer sheet.

ADAPTATION OF EARLY GRADE READING ASSESSMENT (EGRA)

FIELDWORKER: It is very important to assure adequate conditions for the assessment. You should look for a place with adequate lighting (natural or artificial), relative absence of noise and a flat surface for the child to work on. If these conditions are not available, try to look for other space or reschedule if possible.

FIELDWORKER: Use the EGRA stimuli cards and your Fieldworker's manual for this part. Be sure to read the instructions to the child and make sure the child understands what needs to be done. All instructions for administering EGRA are located on your fieldworker's manual. Fill the answers and codes in the given spaces.

1.21	Test administration: Start Time (hour) (possible values: 07 to 17)	Hours: [__ __]
1.22	Test administration: Start Time (minutes) (possible values: 00 to 59)	Minutes: [__ __]

Section A. Familiar Word Identification

FIELDWORKER: Show the child card 1 of the EGRA stimuli cards. Read the instructions in your manual and practice the examples with the child. Ask the child to start reading the words and mark each incorrect word with a slash mark (/). Count self-corrections as correct. This is a **timed exercise**. When 60 seconds have gone by stop the child and **mark the final word attempted before you said "stop" with a bracket (])**. If the child cannot read any of the examples correctly, discontinue this section and go directly to section C: Listening comprehension.

Ask him/her to start reading the story aloud and mark each incorrect word with a slash (/). Count self-corrections as correct. This is a timed exercise. When 60 seconds have gone by mark the final word attempted before with a bracket (]).

Sharada and her grey cat

5

My name is Sharada and I am eight years old.	15
My little brother is Ramesh and he is four. We	25
like to play with our cat. Our cat is grey and fat	37
and she likes to hide behind the big furniture.	46
One day, our cat went missing. We thought	54
she was just playing hide and seek, but we	63
could not find her in her favorite places. So we	73
searched all around the house for the cat.	81
Finally, we found her under the bed, but she was	91
not alone! She had given birth to three kittens:	100
two grey and one white. When we told our parents	110
about the kittens, they told us that mom was also	120
having a baby. We are going to have a sister!	130

SECTION C. LISTENING COMPREHENSION

FIELDWORKER: This is **not** a timed exercise and **there is no stimuli card**. Read two times, aloud and slowly (1 one word per second) the following passage to the child and ask him/her the following questions.

A yellow little chicken was walking through a bridge. Suddenly, he slipped and fell in the river. “Help me! I can’t swim!” he cried. There was a mouse passing by that saw the little chicken and came to help, but he fell in too. “What do we do now? I can’t swim either” said the mouse. “I see something that is coming our way!” the chicken replied. They both climbed on the log and rowed to the shore. “We are saved!” they shouted when they finally arrived to land.

FIELDWORKER: After you read each question, give the child at most 15 seconds to answer each question. **Record the exact answer** given by the child. Do not mark it as correct or incorrect. The answer will be assessed centrally by a professional with experience in test grading.

1.D MATHEMATICS ACHIEVEMENT TEST

FIELDWORKER: It is very important to assure adequate conditions for the assessment. You should look for a place with adequate lighting (natural or artificial), relative absence of noise and a flat surface for the child to work on. If these conditions are not available, try to look for other space or reschedule if possible.

FIELDWORKER: Explain the instructions in your Fieldworker's manual to the child. For the next items show him/her the Numeracy cards and read the instructions on your manual. Record the child's exact response and check if it is correct or incorrect and mark accordingly in spaces given below.

1.52	Test administration: Start Time (hour) (possible values: 07 to 17)	Hours: [_ _]

Booklet. Math Computing

FIELDWORKER: Give the Mathematics Achievement Test Younger Cohort – **Booklet. Math computing** to the child. Read the instructions with the child to make sure she/he understands the instructions (**child must answer the questions in order**). Then let the child work by herself/himself with the test under your supervision. **After 4 minutes** you should register the last item completed by the child without interrupting his/her work. Let the child continue working **until 8 minutes** have passed since the beginning of the test. Then stop the administration. Later on, and without the child present, fill in the answer table below with the exact answers provided by the child.

HELEN THE CYCLIST

Helen has just got a new bike. It has a speedometer which sits on the handlebar.

The speedometer can tell Helen the distance she travels and her average speed for a trip.

25. On one trip, Helen rode 4km in the first 10 minutes and then 2 km in the next 5 minutes. Which one of the following statements is correct?

- A. Helen's average speed was greater in the first 10 minutes than in the next 5 minutes.
- B. Helen's average speed was the same in the first 10 minutes and in the next 5 minutes.
- C. Helen's average speed was less in the first 10 minutes than in the next 5 minutes.

D. It is not possible to tell anything about Helen's average speed from the information given.

26. Helen rode 6 km to her aunt's house. Her speedometer showed that she had averaged 18 km/h for the whole trip. Which one of the following statements is correct?

- A. It took Helen 20 minutes to get her aunt's house.
- B. It took Helen 30 minutes to get her aunt's house.
- C. It took Helen 3 hours to get her aunt's house.
- D. It is not possible to tell how long it took Helen to get to her aunt's house.

27. Helen rode her bike from home to the river, which is 4 km away. It took her 9 minutes. She rode home using a shorter route of 3km. this only took her 6 minutes. What is Helens average, speed, in km/h, for the trip to the river and back?

Read the following text carefully:

Imagine there is a competition in which you are told to give Earth a new name. What would you call it? If you look at the surface of the earth from space, you could call it **[Oceana]**. This would probably be a good name because around 71% of the earth's surface is covered with water, and most of the water – around 97% - can be found in oceans.

Although every ocean and every sea has a different name, they all form one continuous mass of water. The Atlantic, Indian and Pacific are three major oceans. Other masses of water, such as the Mediterranean Sea, Black Sea and the Arctic Ocean are considered part of the Atlantic Ocean. A sea is a part of an ocean but is almost completely surrounded by land.

The Pacific Ocean is the biggest on Earth. Its surface and volume are greater than the Atlantic Ocean and the Indian Ocean combined. The Pacific is also the deepest, with an average depth of 3 350 meters. Although the Indian Ocean is much smaller than the Atlantic, its average depth is greater.

The ocean, formed by salt water, carries an important role in the water cycle. In this cycle, the sun's rays heat the ocean surface. Heat makes water evaporate and change from its liquid phase to gas. Evaporated water, which is pure, enters the atmosphere as water vapour. The salt stays in the ocean.

Wind drags most of the water vapor back towards the earth surface. Part of this vapour condenses in the form of clouds and, with the right conditions; it falls in the form of precipitation (rain, snow and hail). Part of this water goes to rivers and streams and ends back in the ocean. The other part filters through the rocks and soil and becomes part of the groundwater beneath the surface of the Earth. The ocean is a source of fresh water for all living things.

Based on the text, answer the following questions by marking the correct answer with an X.

15. What would be the best title for the text above?

- a. Seas and rivers ☐
- b. Oceans and the water cycle ☐
- c. The biggest oceans in the world ☐
- d. The effect of the wind and rain ☐

16. What Ocean is the biggest on Earth?

- a. Atlantic ☐
- b. Pacific ☐
- c. Indian ☐
- d. Arctic ☐

17. Why is '[Oceana]' a good new name for Earth?

- a. Because it's a nice name ☐
- b. Because the Earth is mostly made up of water in the oceans ☐
- c. Because oceans are an important part of the water cycle ☐
- d. Because oceans are a source of water for all living things ☐

18. According to the text, salt water turns into fresh water when

- a. It falls in the form of rain ☐
- b. It filters through the rocks ☐
- c. It cools ☐
- d. It evaporates and condenses ☐

19. What is a sea and how is it related to an ocean?

- a. A sea is a continuous mass of water, which is the same as an ocean ☐
- b. A sea is a part of an ocean almost completely surrounded by land ☐
- c. A sea is made up of oceans ☐
- d. A sea is a part of an ocean which is not close to any land ☐

20. Which of the following is the most important idea in the previous text?

a. Oceans play a very important role in the water cycle

☐

b. The Atlantic Ocean is bigger than the Indian Ocean

☐

c. The Pacific Ocean is the deepest on Earth

☐

d. The Mediterranean Sea and Arctic Ocean are part of the Atlantic Ocean

Read the following text carefully:

Several members of the cat family have spotted fur. Do you know the difference between a leopard, a jaguar, and a cheetah? From a distance they may appear somewhat similar. Examined at closer range, however, they are clearly different cats. They differ in various ways, including where they live, how big they are, how they move and hunt, and how their fur is marked.

Of all the big cats in the wild, the leopard is found across the largest area. Leopards live in much of Asia and Africa. Leopards are skilled climbers that can hunt monkeys in trees. They can also lie in wait and pounce on passing prey. When food sources are scarce, they might eat fruit, field mice, and large insects. Leopard spots are not actually solid spots; they are broken circles.

The jaguar is native to the Americas. Its natural range is from the southern United States to northern Argentina, with the largest concentration of jaguars being in Brazil and Central America. The beauty and power of the jaguar inspired worship among ancient peoples. Possessing a large head and body, the jaguar has legs that are shorter and thicker than a leopard's. Jaguars are excellent climbers and can also swim well. Their fur can be a vivid yellow color or a rusty shade. Each of their spots is large and black, consisting of a middle spot with a circle of spots around it.

The cheetah's head is smaller than the leopard's, and its body is longer. This cat is built for speed. Its legs are much longer than the leopard's, allowing it to run at speeds of up to **[70 miles per hour]**! This incredible ability helps the cheetahs catch their dinner, which is usually an unfortunate antelope. A cheetah's spots are simply black spots or circles.

What all of these cats have in common is that they are wild, powerful animals of tremendous grace and beauty.

Based on the text, answer the following questions by marking the correct answer with an X.

21. Where in the world is one of the largest concentrations of jaguars?

- a. The wilds of Africa
- b. Brazil and Central America
- c. Northwestern Afghanistan
- d. Northern Argentina

22. Which of the following is NOT a way to tell the difference between spotted cats?

- a. how big they are
- b. how their fur is marked
- c. where they live
- d. how beautiful they are

23. Which of the following is a quality possessed by BOTH leopards and jaguars?

- a. They are skilled climbers
- b. They can swim well
- c. They are built for speed
- d. They can hunt by climbing trees

24. Which words from the passage express an attitude of sympathy for animals that are prey to big cats?

- a. . . . How they move and hunt . . .
- b. . . . Might eat fruit, field mice, and large insects.
- c. . . . Dinner, which is usually an unfortunate antelope
- d. . . . That they are wild, powerful animals . . .

25. What is the difference between a cheetah and a leopard according to the text?

a. The cheetah is faster and the leopard's body is longer

☐

b. Unlike the leopard, the cheetah's spots are just spots not circles and the cheetah's head is larger than the leopard's

☐

c. The leopard can climb trees while the cheetah cannot

☐

d. The cheetah and leopards spots are different and they are different in shape and size

PEABODY PICTURE VOCABULARY TEST (PPVT)

()

FIELDWORKER: It is very important to assure adequate conditions for the assessment. You should look for a place with adequate lighting (natural or artificial), relative absence of noise and a flat surface for the child to work on. If these conditions are not available, try to look for other space or reschedule if possible.

:

,

FIELDWORKER: Use the PPVT picture easel here. Be sure to read the training items with the child and make sure the child understands what needs to be done before starting the test.
